

Molten Metals Projects Overview

- All Molten Metals projects are Brownfield
- History of these projects show that the Antimony these mines produced were used for defense purposes.
- West Gore's Antimony in Canada was used in WW1 and WW2
- Slovak Assets used during the Soviet Union by Russia during the Cold War

Project	Country	Commodity	Status	Economic? (based on historic resources)**	Next Steps
West Gore	Canada	Antimony Gold	<ul style="list-style-type: none"> • Past producer • NI 43-101 	Unknown	- PEA to assess resource
Trojarova	Slovakia	Antimony Gold	<ul style="list-style-type: none"> • Historic Resource in adit • Adit well preserved • Based on historic resource, Trojarova is one of the largest unmined Sb projects globally 	Yes	- Resource/reserve confirmation - PEA
Tienesgrund Spisska Bana	Slovakia	Antimony Gold	<ul style="list-style-type: none"> • 1 adit has been mined • Historic resource on 2 adits (Vysna + Rosabella) • 10km unexplored 	Unknown	- Limited exploration program along the 10km understand whether the known resource might repeat across the mineral concession
Bear Creek Medvedi Potok	Slovakia	Tin	<ul style="list-style-type: none"> • Historic reserves • High grade contained in veins • Has not been explored at depth 	Yes	- Resource/reserve confirmation - Exploration program to explore to depth and determine if resource can be expanded - Apply for conditional mining license

Capital Requirements 2024:

Trojarova: PEA to be undertaken by DMT Engineering – CAD \$680,000 approximately (April: \$80,000, July: \$120,000, August: \$480,000)

West Gore: Summer drill program - CAD \$500,000 approximately

General Admin: Annual burn rate of CAD \$150,000 approximately

CAPITAL STRUCTURE (30/04/24)

Fully paid shares on issue	16,914,288
Options @ CAD\$0.2 / share	1,300,000
Debt	N/A

Listing Date: 8TH AUGUST 2022 | Trading Symbols: CSE : MOLT | FSE: Y44 | Transfer Agent: ODYSSEY TRUST COMPANY
